

Community Education Energy Efficiency Program (CEEP)

Larger than Light

Local Schools Compete for Big Prizes

Through an inter-school competition, the Community Education Efficiency Program will prepare middle and high school students to become energy efficiency auditors. Guided by a CEEP Energy Advisor and Lead Teachers, students of competing schools will receive training designed to help them become energy efficiency auditors and uncover energy conservation measures in their own school. Using a student prepared Energy Conservation Plan & Report, students will implement their own Energy Conservation Measures to win prizes during a three week competition. Energy Conservation Measures, that are considered budget intensive, will be presented to the school district for consideration. Prizes are awarded based on energy savings and content of the Energy Conservation Plans, giving all schools a chance to win.

HOW DO I GET STARTED?

To learn more about the program and early registration incentives, interested teachers and schools are encouraged to contact:

**Registration begins
August 1, 2019**

Additional Information / Terms & Conditions

- Duquesne Light reserves the right to deny a rebate due to depletion of Watt Choices program funds.
- Duquesne Light may require an inspection before issuing the rebate check. The customer must agree, if requested, to grant a Duquesne Light representative site access to verify the installation of the equipment. If the customer refuses to provide access, Duquesne Light has no obligation to provide the customer with a rebate. If the customer's application is selected for on-site verification, rebate processing time may be extended.
- Duquesne Light does not endorse any specific manufacturers, dealers, or contractors.
- Duquesne Light provides no warranty for the installed equipment and/or product. By participating in this program, the customer agrees that Duquesne Light has no liability for the quality, safety, and installation of the equipment/product.
- The program opened June 1, 2016.

Who is MCR Performance Solutions?

Duquesne Light selected MCR Performance Solutions (MCR) in 2008 to assist in design, development and implementation of the Act 129 programs commencing with Phase I. MCR has been a close partner with Duquesne Light since then working on all aspects of Act 129 through Phase I, Phase II and now into Phase III. MCR brings decades of experience in energy efficiency, demand response and regulatory mechanisms.
